## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/08/2007 has been entered.

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-21 are rejected under 35 U.S.C. 102(e) as being anticipated by Wallace et al. (U.S. 6,322,576 B1).

Note in figures 3B, 4B, 6, 10A, 10B, and 23A, a coil (100) having a three-dimensional secondary shape, wherein the secondary shape comprises substantially helical first section (as shown below drawing) and a second section with at least four non-overlapping loops, wherein the non-overlapping comprises a section of the coil in which the primary helical coil (100) is unwound and each loop defining a plane oriented at an angle from about thirty degrees to about one

hundred fifty degrees relative to a plane defined by any immediately preceding, wherein the loops of the second section being wound without contacting each other.

### ***Response to Arguments***

Applicant's arguments filed 10/08/2007 have been fully considered but they are not persuasive. According to applicant, the secondary shapes as described in Wallace et al does not teach or suggest having a substantially helical first section. The examiner does not find persuasive due to the rejection as stated above, where Wallace et al does clearly suggest a **substantially** helical first section (as shown in figure 23A above drawing). For this reason, the Examiner disagrees with Applicant's remarks and has maintained the grounds of rejection under 35 U.S.C. 102 (b) as being anticipated by Wallace et al '576 for the reasons as set forth in the previous and above office actions.

***Conclusion***

2. This is a RCE of applicant's earlier Application No. 10/791,092. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
